

MOODMOON framed  
SEBASTIAN HEPTING 2023

The MOODMOON framed joins the existing MOODMOON luminaire family by designer Sebastian Hepting: In addition to the wall version, the MOODMOON framed is now added, which can be used as a floor or table lamp. This is made possible by a frame stretched with Japanese paper, behind which the light source sits. MOODMOON framed offers light in different moods, ranging from LIQUID GOLD, which is reminiscent of molten, flowing gold and provides a pleasant light in the living room, to INDIGO, a deep blue light that radiates calm and tranquillity. MOODMOON framed can create a total of 17 moods, three more than the classic wall version. Nine of these moods are already included in the wall lamp, eight are new and tailor-made for the framed version. The closed frame allowed the designer to experiment with colourful compositions, as the colour does not radiate onto the wall but is impressively "held" in the frame. The light or the different light moods can be controlled and dimmed via the free Ingo Maurer Digital App, just like the classic MOODMOON. The framed uses the same proven lighting concept on which the classic MOODMOON is based: Human Centric Lighting.

**Light source**

LED max. 45 W (small) / max. 60 W (large), EEC G (A-G).

**Technical data**

125-230 volts. Individually controlled RGBW LEDs can reproduce pre-programmed and stored lighting scenes. The moods can be called up and dimmed via an app. The luminaire contains a W-LAN module. Integration in existing Wi-Fi network possible.

**More info**

A tripod can be purchased as an option. Light is controlled via the Ingo Maurer Digital App. Available free of charge in the App or Android Store.

**Colours**

Cable, box and Japanese paper is white. Tripod is made of ash wood.
