

The Jelly vases and table centre plates are part of a new series of design items through which Kartell in its continuous search for new tactile and aesthetic effects once again demonstrates its technological know-how in experimenting with the texturisation of surfaces. Ideal for any room in the home and adaptable to various uses, the special feature of this series lies in the conformation of the surface material which enhances the core that looks like jelly, just as the name suggests, evocative of the forms used in pastry-making and of the solidity of the plastic of which it is made.
