

BELLE PENDANT Ø36

From Minimalism to Maximalism and Vice Versa! Belle is a versatile pendant lamp suited for both private and public spaces. With multiple color combinations, it works as a standalone piece or in groups. The interplay of aluminum rings, a spun metal cone, and an opal glare shield creates a cohesive, weighted design. A hidden, dimmable LED light source ensures soft, even illumination without glare. Belle comes in two sizes: a smaller version with a 15 cm diameter and a larger one with a 36 cm diameter. These can be combined to create a more expressive look. Made from recycled aluminum, it reduces CO₂ emissions while reflecting our craftsmanship in Varberg. The light source is included, and the lamp features an integrated LED socket with a power of 10 watts, which is dimmable. It has an IP20 rating, a cable length of 2.9 meters, a height of 28.5 cm, and a diameter of 36 cm. Fixed installation. Class II. Designed by Notchi Architects.
